ALENA
ENGINEERING

an ISO 9001:2015 certified company

About Us

We, Alena Engineering, are an India based ISO 9001:2015 certified company based in Chennai and engaged in trading (by way of import and domestic sourcing) and supplying goods to our clients for their various Engineering needs. We provide goods and services catering to multiple industries including telecom/wireless, automotive, industrial and consumer electronics & life sciences.

Our mission is to ensure unmatched customer satisfaction by providing standard and genuine products at competitive rates.

We believe in growing together and strive to build lasting business partnerships with our clients by

- demonstrating consistent capability in offering timely services
- communicating with utmost transparency
- approaching critical project timelines with professional attitude

Alena Engineering is currently strategizing to further expand into the field of Power, Chemical, Food, Pharma and other industrial segments by constantly developing innovative strategies as well as expansion in existing workforce.

We are open for dealerships to represent Indian Subcontinent.

Products

Electronics & Electricals line,

For telecom/wireless, we can support with Evaluation Boards, RF Components (Clocking Solutions, Cavity Filters, EMI/EMC components, Attenuators, Isolators, Circulators, Switches, RF Connectors and Cables), etc

For automotive, life science, industrial & consumer electronics, we can support with Evaluation Boards, Power Supply Modules, Power Supply discrete IC's, Clocking Solutions, etc

For IT industry, we can support with Servers, Printers, Displays, Power Adapters, Accessories, Spares, etc

For lab & testing facility, we can support with Soldering Station, Rework Station, Tips, Tweezers, Chisels, etc

Mechanical line,

For power, chemical, food, pharma and other industrial segments, we can support with sourcing and distributing bought out items like Sensors, Valves, Motors, Gauges, Pipes & Fittings in pneumatic and hydraulic lines, Magnetic Separators, Control Panels, VFDs, various tools/tackles and General Consultancy Services
